PROJECT:

Al Gosaibi Village Shopping Mall

DESCRIPTION:

What used to be a small port and a humble fishing village on the Persian Gulf, Al Khobar has rapidly transformed into a major commercial and shopping center. It is considered a beautiful city with long stretches of coastline, fringed by swaying palm trees. A quick glance at the express way and the cute Al Gosaibi Village shopping mall, one could imagine strolling along the streets in the Mediterranean. Al Gosaibi Village looks different from the ultramodern Middle Eastern mega shopping malls. Located in the heart of the business district, opposite to the Gulf Meridian Hotel, it is eye catching with its amazing exterior colour combinations, resembling southern European classy shopping outlets. However the car parking though is constructed in a grand and wide Middle Eastern style.

Sigma was able to successfully match the striking colour and quality requirements.
