

Highlights

YEAR:

2006 - 2007 - 2008

PROJECT:

1. Al Fardan Twin Tower - 2. Al Qasar Tower
3. QIPCO Twin Tower - 4. Al Emadi Tower

DESCRIPTION:

Sigma Paints Qatar has supplied coatings into the local market since the mid 1970s and today it is one of the largest paint suppliers in Qatar having been involved in many of the major infrastructure and property developments that have been dominating the headlines and the skylines. Many of the ultramodern skyscrapers – including Al Fardan Twin Towers, Al Qasar, Al Emadi and Qipco Twin Towers - carry Sigma’s coatings and 300 year heritage for decoration and protection.

Sigma Paints Qatar has secured many projects not only by offering the highest quality products, but also by providing excellent technical support.

Durability and a smooth finish can only be obtained by applying a combination of apt measures; a properly prepared, well-specified, high-quality paint. Hence, Sigma Qatar regularly conducts seminars and technical and practical training sessions covering all levels that will have some contact or association with paint, from the painters themselves through to the specifiers and clients.
