

Highlights

YEAR:

2009 - 2010

PROJECT:

Al Waab city project, Doha

DESCRIPTION:

Al Waab City was designed to become more than just a commercial property development. Al Waab City will be Doha's first family-oriented community, rooted in Arab traditions and heritage. It is founded on the principle that at the core of every vibrant community is a public gathering space. The Barahat Al Waab will be the vibrant beating heart of the unique development inspired by the vision and life story of Sheikh Nasser Bin Khaled Al Thani. The stretch of land was more than just a manor for the late Sheikh; it was part of this noble man's futuristic vision of a high standard of living in Qatar and a new chapter of successful community living.

Communicating with the consultant for three years and working closely with one of Sigma Paints Qatar's loyal painting contractors, Safari Co Ltd, Sigma successfully closed negotiations for the first contract award for painting of the B & C villas, assisting Safari Co to fully satisfy the requirements of the main contractor. The first package consists of 300 three & four bedroom villas and will total over 600,000m² (QR3million) of coatings internally and externally. Subsequent packages include apartment buildings, commercial areas and hotels.
