

**SIGMA
PAINTS**

Highlights

YEAR:

2008

PROJECT:

Piazza Car Parking

DESCRIPTION:

No car parking can be more sacred than the Piazza Car Parking under the Holy Mosque in Madinah. A car parking of this magnitude deserves divinely unique and protective coatings.

As hairline cracking of rendered surfaces and carbonation of concrete are challenges for any building in Madinah's extreme climatic conditions, Sigma proposed its most advanced paint technology to protect the Holy Mosque's underground. Sigma's superior quality elastomeric crack-bridging & anticarbonation coating system was blessed by all parties, especially as Sigma advised and supervised every step of the application process. Thus Piazza Car Parking received a divinely durable finish coat.

OWNER:

Government

LOCATION / COUNTRY:

Madinah - KSA

SIZE (Sqm):

180,000 m²

CONTRACTOR:

Saudi Bin Ladin Group
