

YEAR:

2007

PROJECT:

Al Faisal University

DESCRIPTION:

Al Faisal University is one of the most prestigious projects in the higher education segment in KSA – unique of its kind. It sets precedence as it pioneers the way in forging relationships with business communities and prominent business leaders in collaboration with the Riyadh Chamber of Commerce and Industry. In the pursuit of building associations and strong links with industry and commerce, it is set to achieve the common goal of the Kingdom's strategic objective for economic, social and educational advancement.

Sigma's technical expertise satisfied the consultant's hunger for information and quest for optimal solutions. Buro Happold's aspirations were fully matched. The contractor, Ahmad Zaki Saudi Arabia, was initially surprised, then equally impressed with Sigma's services. Upon the company's management arrival from Malaysia to KSA, they found Sigma already waiting with its first batch of samples. The consequent A4, wet and site samples, coupled with specification explanations and product presentations, placed Sigma way ahead of its competitors. The contractor had gained eminence for its prestigious towers in Malaysia and thus would only opt for the best in KSA.
