

YEAR:

2009

PROJECT:

Silver Spirit

DESCRIPTION:

Fincantieri Ancona S/Y had a celebration of their own with the launch of the "Silver Spirit", the first luxury cruise ship ordered from Fincantieri by Silver Sea Group Monaco, one of the leading players in luxury cruises. 195 meters long and with a gross tonnage of 36,000 tonnes, this new ship will be able to accommodate over 540 passengers in her 270 cabins and 34 suites.

The most important products we supplied for the project are the following:

4,000 liters of Sigma AlphaGen 650 (3 x 100 microns) antifouling system on 4.600 sqm of hull

4,000 liters of SigmaDur 550 for about 15,000 sqm of topside and external superstructures

8,000 liters of Sigma Phenguard system into 8,500 sqm of grey water tanks

5,000 liters of SigmaGuard CSF 585 into 5,600 sqm of potable water tanks

18,000 liters of SigmaPrime 700 system (2 x 160 microns as per new IMO rules) into 24,000 sqm of ballast tanks
