

Highlights

YEAR:

2005 - 2006

PROJECT:

Movenpick Hotel - Sana'a

DESCRIPTION:

The Movenpick Hotel in Sana'a was built at 2,350 meters above sea level, overlooking the historic Yemeni city. As the biggest, most prestigious and newest 5-star hotel in Yemen, The Movenpick Hotel accommodates dignitaries and state visitors. The shape and design of the building is a modern version of traditional Yemeni houses, while the interior finishing and facilities match any luxurious hotel in the world. The 10-floor hotel is equipped with 338 spacious rooms, restaurants, coffee shops, gym, spa, discotheque and the largest convention facilities in town. It is located just 5km from the city center and oldest buildings in the world. The airport is also in the vicinity.

From the very beginning, Sigma's Yemen branch built a strong rapport with the consultant (Societe Mouawad-Edde), which is based in Beirut, as well as the owner, International Company for Touristic & Investments Ltd. Sigma Yemen offered advice, technical assistance and information about the various paint specifications required for such a luxurious, international standard hotel project, and subsequently provided many apt solutions to the satisfaction of all parties.
